## PACKAGE CONTENTS

2 Sign Panels With Grommets  
Zip Ties To Attach Sign Panels

Max Pole Size is 6" Diameter

## Fast and Easy Set-Up

1.

- Take the two panels and put them back to back lining up the brass grommets.
- Thread the Zip Ties through the brass grommets along one edge. Leave one end open to slide the sign onto the pole.
- Cut the extra slack on the Zip Ties to maintain a clean look

2.

- Assemble the sign at the base of the pole.
- With the one side of the panels connected, slide the sign onto the pole. (Max Pole Diameter - 6in.)
- Line the sign up so the pole is centered between the center two grommets.

3.

- Connect the long zip ties to wrap though the grommets and around the pole. Be sure to make these tight to secure the sign.
- Once the center is connected, continue to connect all around the sign with the Zip Ties.
- You can now push the sign up to the desired height.
